

Jason's Drive List

These are the Drives I currently use with Makemkv and are known good.

- LG WH16NS60 (Updated with the firmware referenced in the Makemkv Forum)
- Pioneer BDR-S13U - Purchased Pre-Flashed but seller no longer has in stock

Drive Enclosure - All the drives I use were for Internal use so I use the following Enclosures. (I have had problems with generic or less expensive enclosures)

- OWC Mercury Pro
