

Cataloging Tools

Software:	CLZ		
Why\Problem Solved:	When you grow your collection beyond a few titles you need a system for keeping track. Without it you lose discs, buy doubles and can never find what you're looking for. This is far and away the best software I've used for tracking collections. I also use their Comics and Book versions. They also are one of the few who offer software you can run locally as well as cloud offerings. I use both and keep them in sync.		
Cost:	Varries based on app(s) used	Link:	https://clz.com/movies
My Collection:	https://cloud.clz.com/762980/movies		
Tips\Screenshot:	 The screenshot shows the CLZ Movie Collector 23.3.5 application window. The top menu bar includes File, Edit, Search, View, Loans, CLZ Cloud, CLZ Core, Tools, and Help. Below the menu is a toolbar with icons for adding movies, folders, and other functions. A main table lists 2162 movies with columns for Title, Movie..., Running TL..., IMDb Rating, Director, and Genre. The movie 'Abigail' is selected, and its details are shown in a panel below the table. The details panel includes the movie's cover art, title 'Abigail', studio 'Universal Pictures (2024)', genre 'Horror, Thriller', and IMDb rating '6.6'. It also shows the number of copies owned (#1461) and the number of copies wanted (0). The bottom status bar indicates 'Selected: 1 of 100 movies' and 'Note First Letter - A'.		

Revision #1
